

DelfiX

Trading Decision Technology for the FX & Capital Markets

DelfiX provides the technology that enables traders and market professionals, to take informed and timely decisions in pinpointing trading opportunities and maximizing profit.

The key breakthrough features of **DelfiX** are:

- Precise and systematic identification of critical price levels for intra-day, medium and long-term trading in the following currency pairs:

EUR, GBP, JPY, CHF, CAD, AUD, NZD, TRY...

EURGBP, EURJPY, EURCHF...

...as well as the core bond markets

...and the core equity markets

- Determination of market direction pathways and price transition probabilities
- "Traffic Light" timing guidance for entry/holding/closing positions
- Systematic generation of critical price level reports

DelfiX is inspired by 'a picture is worth a thousand words' as there are times when fast decisions are needed and words or complex formulae cannot convey a comprehensive message.

DelfiX provides a pragmatic financial engineering solution for fast and effective information delivery. The platform automatically calculates success rates, profitability, new targets/stop levels and lends itself to both discretionary and algorithmic trading.

DelfiX is used by FX and Multi-Asset management desks of major European & US banks for active trading and client advisory support.
